### **MEMORANDUM**

DATE: March 7, 2023  
TO: KMT  
FROM: ALDOT  
RE: Utility – Alabama Power Transmission

---

In 2018, ALDOT coordinated with Alabama Power Transmission on the requirements for relocating the transmission line that will conflict with the reference design at the East Tunnel interchange. The proposed relocations shown below have been evaluated using final base design and have not been evaluated for temporary construction impacts.

#### **East Tunnel Interchange:**

Structure (pole) #3 & #5 will stay in place and be raised to a height of 195' (top of pole), the conductor elevation will be approximately 135' (bottom conductor elevation) (see attached map for structure locations)  
Structure (pole) #4 will be removed
